

Summary of the new CONVOTHERM On-Live-training concepts

Description of Convotherm On-Live Service Training for 2nd half of 2026:

1. Benefits and content of the various training options
2. General information (Services, prices, duration and requirements)
3. Registration form (training dates)

OnLive Trainings concept:

We will be offering a **new On-Live trainings concept starting 2026**. This combines the advantages of both training options into a single, new training concept – significantly reducing training times and costs (travel expenses, absence, etc.) for you.

Advantages of Online trainings / trainings video:

- Unlimited numbers of participants
- Regionally independent and flexible
- Free of charge
- Reduced organizational effort
- Rapid transfer of basic knowledge

Advantages of a Basis preparatory training On-Live:

- Learning at your own pace
- Optimal time of day, freely selectable
- Location independent
- Cost-effective

Why is a basic preparation training necessary:

- Shortened live training time (since the topics have already been covered)
- Participants have the same level of knowledge in preparation for the live and online training
- The following topics will be presented in a recording:
 - Product presentation (presentation of unit variantes, online help, software updates on the unit, service USPs, news, unit installation, water quality).

Advantages of live trainings:

- Trainer-supported, personal coaching in small groups
- Practical work on the equipment
- Individual discussion and exchange of experiences with other participants of the the knowledge- / training test.
